# EINLADUNG

Kolloquium  
Wintersemester 2020 / 2021

---

**Dr. Riccardo Massei**

University of Antwerp  
Department of Veterinary Sciences

hält am Dienstag, den **01.12.2020**, um 16:15 Uhr einen Vortrag  
über

**„Bioanalytical tools for the identification of neuroactive/  
neurotoxic compounds in freshwater environments“**

---

Aquatic ecosystems are an essential source of life for both aquatic and terrestrial species. However, the progressive increase of industrial activities over the last century has played a major role in the deterioration in quality of freshwater resources. In particular, the numbers of potential neurotoxicants in the environment are raising and pose a great risk for humans and the environment. However, there is still a general lack of knowledge regarding the incidence of neuroactive chemicals in freshwater environments and their associated risks. Consequently, it is necessary to develop novel bioanalytical strategies for the detection of neuroactive chemicals in the environment.

Dr. Riccardo Massei

Einladender: Prof. Dr. Henner Hollert
